PROFILE

I love building things—especially in the digital world. My journey began years ago with web development, and I still enjoy it just as much today. Over the years, I've worked across the full stack, from frontend development to system administration. What drives me most is learning new technologies and applying them to create better solutions.
I believe that a good job is one done with care and excellence, and I bring that mindset to everything I do.

EXPERIENCE

Ukio
Nov. 2025 - Now Engineering Manager

Description: Lead the team responsible for guest operations and guest experience. Delivered a new mobile app for the operations team, an inventory module for the backoffice, and AI-assisted improvements to the team's workflow.

Tools:
Expo/React Native · Elixir · Phoenix · Next.js

Landbot
Oct. 2022 - Sep. 2025 Engineering Manager

Description: Led two teams simultaneously (Platform and Product), driving collaboration and alignment by fostering a culture of knowledge sharing, training, and continuous improvement. Enhanced documentation standards and streamlined decision-making processes. Designed and implemented new CI/CD pipelines, moving the company from once-a-day releases to continuous deployment. Established and scaled a company-wide observability culture, improving reliability and shortening feedback loops.

Tools:
React · Python · Fast Api · GCP · Terraform · Kubernetes

Tinybird
Feb. 2022 - Sep. 2022 Frontend Developer

Description: Developed new features to optimize query and endpoint performance through materialization. Enhanced the online query editor with intelligent hints and clearer error highlighting, making it easier to use and quicker to debug.

Tools:
React · Redux · ClickHouse · Graphql · Ansible

Kodify
Oct. 2015 - Feb. 2022 Fullstack Team Lead

Description: Led the migration of a high-traffic Symfony/jQuery website (porntube.com) to a modern Node.js/React platform. Designed and implemented a high-throughput event logging system built on Node.js, AWS Kinesis, and Redshift to power internal analytics and reporting. Rebuilt Blacked.com from a React SPA into an ISR-enabled Next.js application with GraphQL, improving scalability and performance.

Tools:
React · Redux · Next.js · Graphql · Kinesis · Redshift · Kubernetes

Chicplace
Apr. 2014 - Oct. 2015 CTO

Description: Led a team of four developers in refactoring and modernizing the platform's codebase. Improved the system architecture by introducing autoscaling and migrating services to AWS, significantly boosting performance and enabling the company's market expansion into LATAM.

Tools:
Symfony · Vagrant · Bootstrap

Ofertix
Jun. 2010 - Apr. 2014 Tech Lead

Description: Developed backend and frontend for all of the company's platforms (Ofertix.com, NiceAndCrazy.com, NiceAndCrazy.fr, Primeriti.es). Also built supporting infrastructure, including a custom deployment system inspired by Capistrano and a Redis-based HTTP cache library for Symfony.

Tools:
Symfony · RabbitMQ · Capistrano

SIDE PROJECTS

La Liga Pirenaica
May 2025 - Now Jack of all trades

Description: Planned and managed a large-scale motorcycle event in the Pyrenees, coordinating website development, progress-tracking tools, logistics, and participant communication to ensure an efficient, well-organized, and successful experience.

Tools:
Expo/React Native · Astro
